JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

A COURSE IN NURSING SERVICE IN INDUSTRY.

The New York University, School of Commerce, Accounts, and Finance, will offer a course the second semester (February to June, 1920) in Standardization of Nursing Service in Industry. The course is especially arranged for industrial nurses, welfare workers, and those who contemplate entering the field of industrial welfare work.

A genuine solicitude for the physical well-being of employees is a fundamental prerequisite in creating better relations in industry. To-day's workers and employers have not grasped the importance of health to the toiler and the extent to which conditions can be improved so as to eliminate sickness and fatigue, now regarded as the underlying causes of inefficiency in industry.

The course will include lectures and group discussions of up-to-date industrial nursing methods, first-aid service, first-aid equipment, and prevention work in the industrial plant.

Students enrolled in the course will be given an opportunity to make special investigations of nursing problems in large industrial plants, with particular reference to administration and organization.

Special consideration will be given to such topics as—

- (1) Duties and responsibilities of the nurse in small and large industries;
- (2) Methods of teaching the worker and his family how to keep well;
- (3) Most approved methods required for follow-up health service in the plant;
- (4) Relation of the nurse to the industrial community;
- (5) Home nursing and personal hygiene;
- (6) Reducing labor turnover through health measures; and
- (7) Amount of hospital care available for the worker.

The class meets each Monday from 6 to 7.45 p. m., for 15 consecutive weeks, beginning Monday, February 2. The fee for the course of one term is \$12, plus a university fee of \$5, payable in advance. The enrollment will be limited, and applicants must be approved by the director of the department, Prof. Galloway, or by the instructor, Miss Elizabeth H. Bohn.

Further information may be obtained by addressing Prof. Lee Galloway, Director of the Department of Business Management, New York University, School of Commerce, Accounts, and Finance, Room 803C, 32 Waverly Place, on Washington Square, New York City.
